1. The following is an examiner's statement of reasons for allowance:

Applicants show a tablet consisting essentially of hydrated calcium hypochlorite, magnesium sulfate heptahydrate and lime. The prior art shows similar tablets. Dychdala et al US 3,793,216, considered the closest prior art of record, discloses calcium hypochlorite tablets wherein an inorganic salt such as magnesium sulfate heptahydrate may be present providing a water content within the range of about 3 to about 13 %. The prior art does not show nor fairly suggest applicants' particular combination of hydrated calcium hypochlorite with magnesium sulfate heptahydrate and lime in an amount of 0.1% to about 10%, wherein the blend contains at least about 17% water by weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1-14 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M Spear
